

General Performance Test Report

Environment: UAT | <https://uat-api-seller.amaze-x.com>

Generated At: 2026-07-24 00:34:24 GMT+7

Executive Summary

APIs Evaluated 14	Official Runs 70
Passed Runs 52	Warning Runs 18
Unknown Runs 0	Pass Rate 74.29%
APIs Requiring Attention 9	

Overall Assessment

SIGNIFICANT WARNINGS

Conclusion

Material performance warnings were identified across the evaluated scope. Address the affected APIs and complete targeted retesting before approving higher traffic levels.

Key Findings

[Back to Contents](#)

WARNING - Seller Login Seller Login: p95 standard threshold exceeded. VU 50; P95 6,392.26 ms versus 3,000 ms threshold.
WARNING - Seller Login Seller Login: error rate threshold exceeded. VU 100; Error Rate 31.80% versus 1.00% threshold.
WARNING - Seller Login Seller Login: error rate threshold exceeded. VU 200; Error Rate 99.38% versus 1.00% threshold.
WARNING - Update Product Info V3 Update Product Info V3: error rate threshold exceeded. VU 200; Error Rate 11.49% versus 1.00% threshold.
WARNING - Seller Login Seller Login: p95 high load threshold exceeded. VU 100; P95 13,400.39 ms versus 10,000 ms threshold.

Recommendations

[Back to Contents](#)

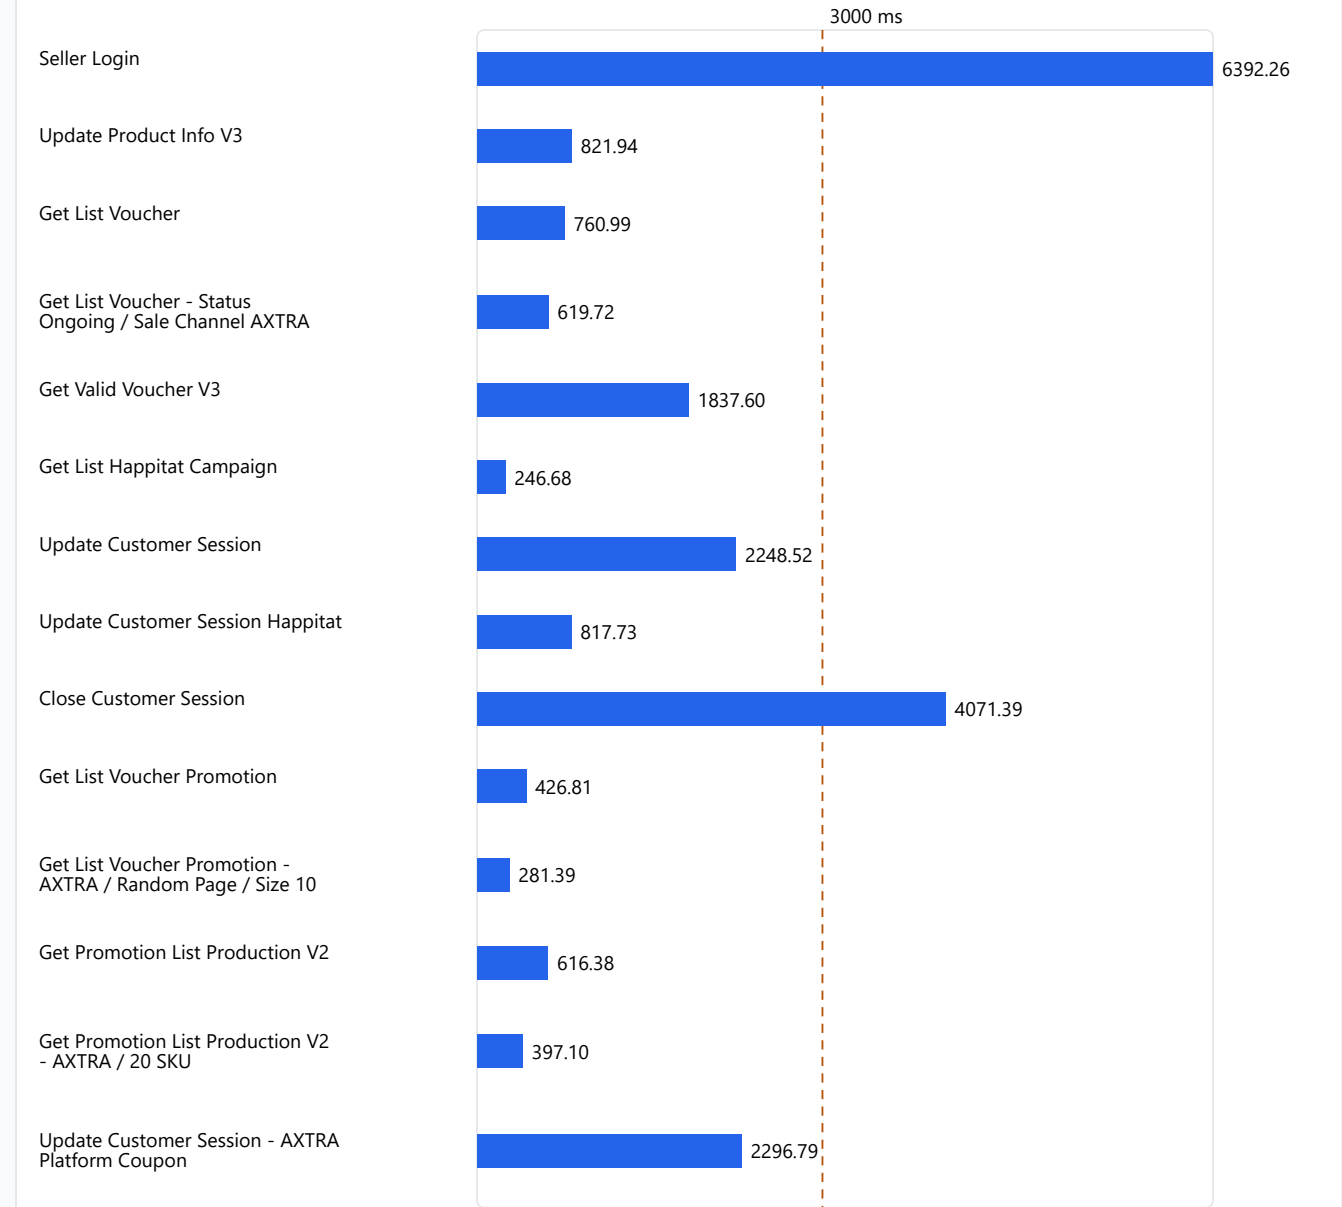

- Investigate downstream latency, connection pooling, queueing, and timeout behavior for the affected API.
- Review request failures and classified error data at the affected load levels before approving higher traffic.
- Investigate high-load latency before increasing concurrency.
- Generate or repair Error Statistics data before performing root-cause classification.

API Portfolio Overview

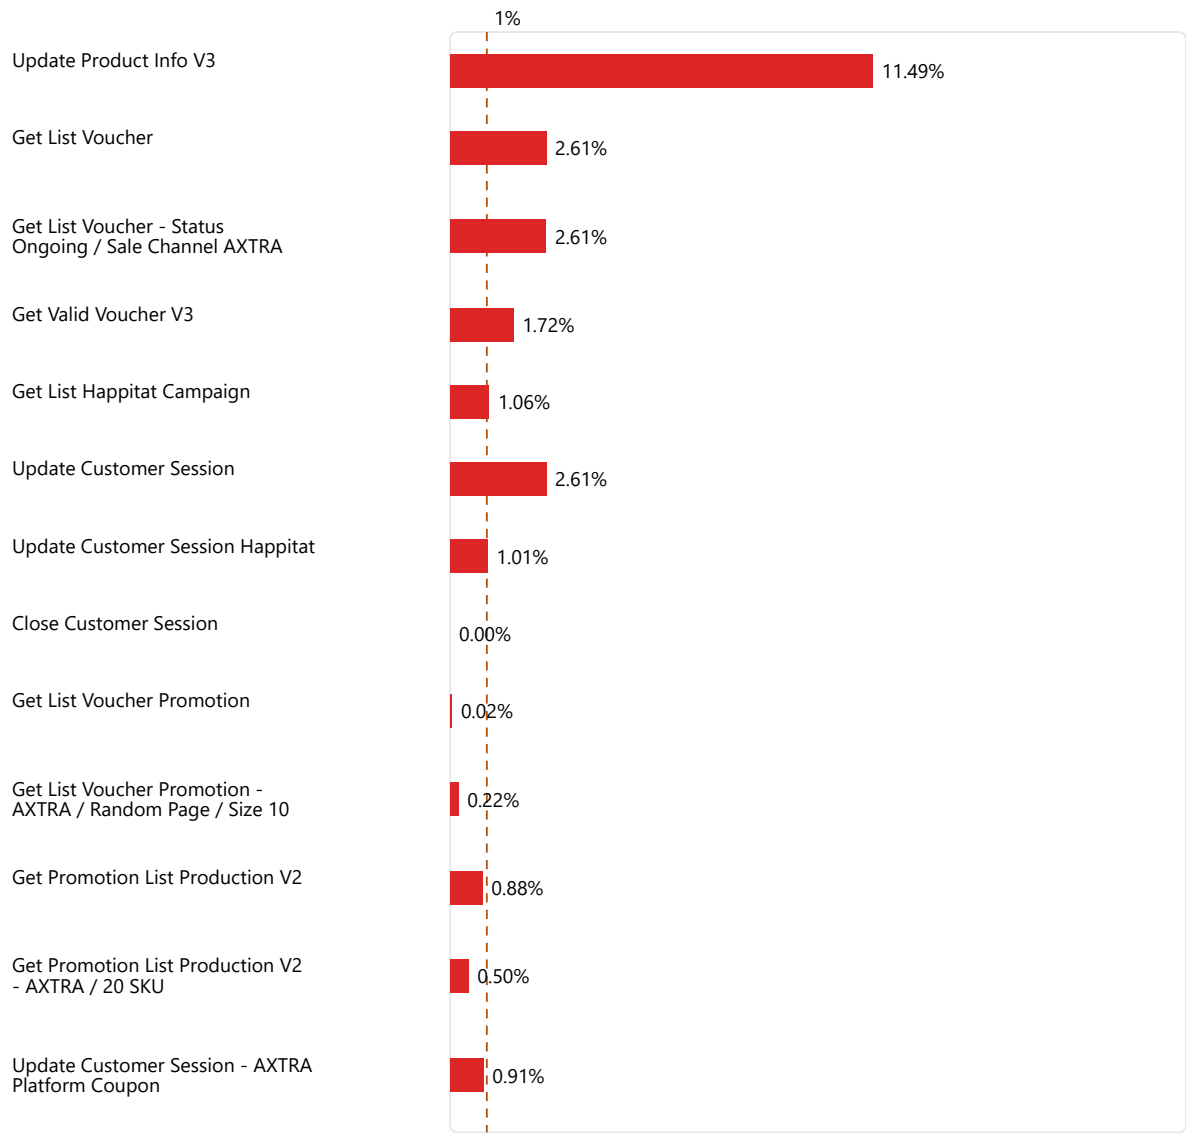

API	Overall Status	First Warning VU	P95 at 50 VU	P95 at Highest VU	Max Error Rate
Seller Login	WARNING	50	6392.26	3010.33	99.38%
